

QUALITY

Winnebago RVs are designed and built around you, with superior craftsmanship, advanced manufacturing technologies and steel-focused construction to enhance safety and reliability.

INNOVATION

From groundbreaking RVs to game-changing features to the spacious floorplans made possible by our SmartSpace™ design, our heritage is unrivaled for continuous industry firsts in vehicle technology and design.

SERVICE

Our carefully chosen dealers are supported by factory training and our advanced parts supply system, while owners benefit from excellent real-world customer support as well as 24/7 access to online technical information.

BELONGING

Winnebago owners are a connected community – some of the friendliest, most knowledgeable and welcoming RVers you'll find anywhere.

MICRO MINNIE

Tow Small. Live Big.

The Micro Minnie comes fully loaded with big features and spacious floorplans, yet at just 7 feet wide, it's easy to tow and right at home in any campsite.

Enhance Any Campsite

To enhance outdoor living space, the powered patio awning with LED lighting and JBL® premium exterior speakers provides an area to relax rain or shine. Exterior pass-through storage allows for easy access to larger items like camping chairs, while keeping them secure when the thick-core slam latch doors are shut.

Well-Designed Interior Spaces

The Micro Minnie is our most versatile model. With several floorplans to choose from, and options to sleep up to 5 comfortably. Some slideout equipped floorplans have an optional upgrade to an EZ-Glide Sofa Sleeper with hutch and table instead of the standard dinette. All are equipped with the JBL® Aura Cube entertainment center, JBL® premium interior speakers, and a Smart TV.

Camp in Comfort

The 1.5" thick fiberglass sidewalls with Azdel Onboard® composite paneling, a 1-piece thermofoil roof membrane, and fully enclosed underbelly with radiant foil insulation keep you cool in the summer and prevent heat loss during extended season camping. The fully enclosed holding tanks with 12-volt tank pad heaters have an interior switch to prevent freezing, while an optional 15,000 BTU air conditioner upgrade helps in warmer climates.

A New Standard for Standard Features

Every Micro Minnie features a 200-watt solar panel and 30-amp charge controller, as well as side mount solar prep for an additional portable panel. The unit rests on 15" Goodyear Wrangler tires connected to dual torsion axles. The body of the unit also features a fully walkable roof complete with a roof ladder, a power tongue jack, power stabilizing jacks, and a 2" accessory receiver.

Well Designed Interior Space.

Galley

The open galley is fully equipped and ready to cook with solid surface counter tops, a 3 burner cooktop (2-burner- 2025B), convection microwave oven and a large refrigerator.

Sleeping Accommodations

One rear-living floorplan and multiple bunkhouse floorplans feature comfortable accommodations that boost sleeping capacity to 5.

Dry Bath

A true luxury in a smaller travel trailer: the spacious dry bath includes a roomy separate shower.

Rest Up

When night comes, the large windows provide cross-flow ventilation for the large, comfortable bed.

Take Control

An intuitive control panel saves steps by locating key system controls in one convenient location.

FOOTNOTES

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of our vehicle may vary by several inches depending on chassis or equipment variations. Please contact your dealer for further information.
- Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Sleeping capacity is the maximum based on a specific floorplan.

Because features, specification, equipment, and options may vary from those highlighted here, the buyer is responsible for confirming with the dealer the features, specifications, equipment, and options included in their specific vehicle.

In addition, Winnebago's program of continuous product improvement may result in changes to vehicle specifications, equipment, model availability, and price without notice.
